## PROFILE

An ambitious problem solver with a passion for web development, and who would like to join a team of like-minded engineers. Proficient in JavaScript and React with a desire to learn all new technologies. I enjoy using the latest technology to deliver the simplest solution.

## EXPERIENCE

### Freelance Web Developer

2019 - Present

Fully-Remote

London, UK

- Working with clients to gather requirements and outline designs.
- Building reusable components with responsive design in mind.
- Programmed and developed backend using node and headless CMS for clients to manage content.
- I've worked with apollo client to query and mutate data using GraphQL hooks.
- Identifying code, solving problems and debugging errors.
- Applied lazy-loading React components and using NextJS for dynamic server side rendering. Deployment with custom domain using Heroku/Netlify.

### Junior React Developer

Jan 2019 – Dec 2019

Hafnium Research

London, UK

- Collaborated with a team of interface designers and engineers.
- Building reusable components for future project use.
- Utilizing state management such as Redux.
- Developed user interfaces according to sketch designs and consumed APIs whilst learning backend development.
- I've worked with Gatsby framework for static site rendering.

### Electrician (Part-Time)

2014 - 2019

Jae Electricals

London, UK

## EDUCATION

BSc Computer Science  
Brunel University  
Sep 2014 – May 2017  
London, UK
